

Secured File Upload/Download

NWS is happy to offer a new secure file sharing service to our customers. This service is a way for companies and agencies to securely share files via the Internet.

Brief Description

Secured File Upload/Download is a set of folders that are maintained in the secured area of your site. This could be setup as the secured area of your site, or could be an addition to the secured area of your site. The folder system allows for agents/agencies and companies to share files easily and securely.

Agency 'Common' Folder

In this area there is a 'common' folder which can contain information for ALL of your agencies. For instance this would be a good place to store forms, manuals, rates and so forth. Every agency that logs in would have access to view/download the items located in this folder.

Agency Specific Folder

In this area there can be a specific folder for each agency. When logged in, the agency would ONLY be able to see their folder and the common folder. This allows you to place any agency specific information into their folder for them to upload/download.

Upload Folder

Along with the 'common' folder where the agencies can download information, the company can also have another folder where the agencies can upload files for the company to view. For instance, if you have word fill-in forms, the agency can fill in the form, save it and upload it to the 'upload' folder. The company can then log in and download any forms that have been uploaded to this folder. The agency can't view what is in that folder, they can only upload to it, so that all agencies can upload files that only the company can view.

Pricing

# of Users	Cost
5 Users	\$99
15 Users	\$199
25 Users	\$299
50 User	\$399
100 Users	\$499
200 Users	\$599
300 Users	\$699

* Setup fees apply.
Approx. 1 hour @ \$75/hour per 50 users.

Functionality

This system is web-based. The company can log in through a web browser and view/upload/download anything to any folder at any time without the help of NWS.

Below are a few screen shots of the file sharing upload/download to give you an idea of how the system works. NWS offers a conference call/web demo of the service if you are interested in learning more.

The COMPANY view

You will see your common folder, plus every agency folder (Demouser)

The AGENT/AGENCY view

The agent can see the companies 'common' folder, plus their folder, but no other agency folders.
