

NAMIC Agent Locator

Features:

- Visitors to your site can search for agencies using either a list of counties, zip codes and/or a full color state map.
- Clicking on an agency link opens a new browser window: your site remains on the visitors screen while they review agency information
- Seamlessly integrated with the "look and feel" of your site
- Database-driven, so it's easy to update as your agency force changes

What's included:

- Locator page(s) containing clickable county maps, and/or drop down lists.
- Search results page, contains matching agencies and corresponding contact information – including e-mail and web site addresses if desired.

System requirements:

- Web Server running Microsoft Internet Information Server 4.0 (or higher), Microsoft Data Access Components 2.5 (or higher).
- Works with Netscape or Microsoft browsers, version 3 and higher.
